EDUCATION

Vellore Institute of Technology

Bhopal, India

Bachelor of Technology in Computer Science (Cloud Computing & Automation) – CGPA: 8.13/10.0 Sep. 2023 – May 2027

- Relevant Coursework: Data Structures, Algorithms, Database Management Systems, Operating Systems, Software Engineering, Web Development, Cloud Computing

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C++, HTML, SQL, Bash

Web Development: React, jQuery, Twitter Bootstrap, Flask, Web-Based Application Development

Database Platforms: MySQL, PostgreSQL, Oracle, Relational Database (SQL), Database Design

Cloud Technologies: Amazon Web Services (AWS), Oracle Cloud Infrastructure (OCI), Docker, CI/CD Pipelines

Frameworks & Tools: .NET, PyTorch, TensorFlow, Git, Linux, Agile Methodologies, Object-Oriented Design, Complexity Analysis, Distributed Systems

PROJECTS

VOXIDE – Full-Stack Web-Based IDE | Python, C++, JavaScript, React, Flask

Mar 2024 – Jun 2024

- Implemented full-stack web-based application with modern front-end using React, Twitter Bootstrap, and JavaScript, handling **1,0000+ concurrent requests in distributed environment** and achieving **92% user satisfaction** through intuitive UI/UX design.
- Engineered scalable and fault-tolerant REST APIs in Flask with PostgreSQL, optimizing distributed query handling and reducing latency by **35%**, successfully supporting **10,000+ concurrent requests**.
- Integrated external AI API with secure authentication, implementing code execution sandbox using Docker containerization that prevented **15 security vulnerabilities** while improving code suggestion accuracy by **30%**.
- Partnered with cross-functional teams in agile cycles to deliver production-ready features ahead of schedule.

Career Quest – Data-Driven Recommendation Engine | Python, Flask, MySQL, jQuery

Oct 2023 – Jan 2024

- Designed a modular web application using Python/Flask integrating 10+ APIs; optimized MySQL schema improving query speed by **40%** through algorithmic optimization.
- Engineered ML-based **prediction engine** in Scikit-learn with **85% accuracy**, enabling real-time personalization across **50,000+ records** in under 2s.
- Implemented secure authentication with SQL injection prevention, blocking **100%** of attacks and ensuring GDPR compliance for **5,000+ users**.

AI-DOCTOR – Healthcare Web Application | Python, Flask, React, PostgreSQL

Feb 2024 – Mar 2024

- Developed **multimodal data processing** web application with React front-end and Flask backend, integrating PostgreSQL to manage **500+ patient records** under HIPAA compliance.
- Built **distributed ML pipeline** in PyTorch on **25,000+ medical images**, improving diagnostic accuracy by **28%** and reducing query time by **35%**.
- Collaborated in agile sprints with 3-person team using Git, delivering project **2 weeks ahead of schedule** with complete system documentation.

Data Classification Pipeline with AWS | Python, TensorFlow, AWS, MySQL

Aug 2024 – Nov 2024

- Architected **fault-tolerant cloud architecture** on AWS (EC2, S3, Lambda) processing **100GB+ weekly data**, implementing **distributed classification system** in TensorFlow with **89% accuracy**.
- Optimized MySQL indexing and query patterns, reducing retrieval time by **55%** while ensuring integrity across **8 microservices**.
- Deployed **real-time anomaly detection** system monitoring **50,000+ daily transactions**, cutting incident response time from **72 hours to 15 minutes**.

CORE COMPETENCIES

Distributed Systems • Fault-Tolerant Architecture • Predictive Modeling • Object-Oriented Design • Algorithmic Optimization • Agile Development • RESTful APIs • Cloud Computing (AWS, OCI) • Python • C++ • Java • SQL Optimization • Docker • CI/CD

CERTIFICATIONS

AWS Cloud Practitioner • Oracle DevOps 2025 • Oracle Data Science 2025 • NVIDIA CUDA C/C++ • NVIDIA Deep Learning Institute (DLI) • Coursera Advanced Learning Algorithms • Coursera Applied Machine Learning
