EDUCATION

Vellore Institute of Technology

Bhopal, India

Bachelor of Technology in Computer Science (Cloud Computing & Automation) – CGPA: 8.36/10.0 Sep 2023 – May 2027

- Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Web Development, Cloud Computing

TECHNICAL SKILLS

Programming & Scripting: Python, Java, JavaScript, C++, SQL, Bash, Shell Scripting

Web Development: React, Twitter Bootstrap, Flask, RESTful API Development

Database Platforms: MySQL, PostgreSQL, Oracle Database, Relational Schema Design, Query Optimization

Cloud & Infrastructure: AWS, Oracle Cloud Infrastructure, Docker, Kubernetes, CI/CD, Disaster Recovery, HA

DevOps & Automation: GitLab (SCM, CI), Jenkins CI, Terraform, Ansible, Governance Tools, Artifactory, JIRA

Frameworks & Practices: PyTorch, TensorFlow, .NET, Linux/UNIX, Agile (SCRUM), Predictive Modeling

EXPERIENCE

India Space Lab

Remote

Space Science and Technology Intern

Dec 2024 – Jan 2025

- Collaborated with senior engineers on a technical internship focusing on advanced Space Science modules.
- Gained specialized knowledge and hands-on exposure to Advanced Drone Technology, CanSat, and CubeSat.
- Presented findings on Space Entrepreneurship, connecting technical space systems with commercial applications.

PROJECTS

AROT.tech – VPN & Market Intelligence Platform | React, TypeScript, Node.js, Azure

Sep 2024 – Present

- Led a cross-functional team to build a production platform offering VPN access and financial market tools.
- Coordinated finance-data integrations, automation scripts, and backend functions to power market dashboards.
- Authored technical SEO guidelines and content architecture, driving the platform to reach 1,000+ daily active users.

Data Classification Pipeline with AWS | Python, TensorFlow, AWS, MySQL

Jun 2024 – Nov 2024

- Architected a fault-tolerant cloud system on AWS (EC2, S3, Lambda) capable of processing 100GB+ of weekly data.
- Communicated infrastructure requirements and automated provisioning with Ansible & Terraform across 8 microservices.
- Implemented Disaster Recovery (DR) & High Availability (HA) strategies, reducing downtime risk by 40%.

VOXIDE – Full-Stack Web-Based IDE | Python, C++, React, Flask

Mar 2024 – Aug 2024

- Collaborated with peers to integrate GitLab CI/CD pipelines for automated testing, reducing manual effort by 60%.
- Optimized distributed query handling in Flask/PostgreSQL, reducing latency by 35% and supporting 10,000+ requests.
- Containerized execution sandbox environments using Docker & Kubernetes to eliminate 15+ security vulnerabilities.

AI-DOCTOR – Healthcare Web Application | Python, Flask, React, PostgreSQL

Feb 2024 – Apr 2024

- Developed a multimodal data processing app to securely manage 500+ patient records under HIPAA compliance.
- Implemented a distributed PyTorch ML pipeline on 25,000+ medical images, improving diagnostic accuracy by 28%.
- Provisioned scalable cloud infrastructure using Terraform to ensure reliable deployment across multiple environments.

CERTIFICATIONS

Cloud & DevOps: Oracle Certified DevOps Professional (2025), AWS Cloud Practitioner, Coursera Kubernetes, Terraform

Data Science & ML: Oracle Certified Data Science Professional (2025), Coursera Applied Machine Learning, NVIDIA DLI

Programming & HPC: NVIDIA CUDA C/C++
